

Exclusive screenings of *Life Without Benedetta*

A project supporting those suffering the effects of terrorism...we invite you to attend a special evening.

Life With Loss...is to become a new charity which will support 'everyday people' in rebuilding their lives after they were severely effected by acts of terrorism so that they can regenerate their love for living.

Life Without Benedetta...is a documentary which tells the true story of Benedetta Ciaccia, a young woman from Rome who lived in London and died on 7th July 2005 in the bombings. It is told from the perspective of her former long term partner / best friend and powerfully shares the experience of losing a loved one rather than being desensitised to the knowledge that people died.

So far...the documentary has proved extremely successful with the 7/7 Community (loved ones of victims and those who survived). After tears were shed, members of the community have provided feedback that this story touched their hearts and it needs to be shown around the world. The documentary has attracted National and International media including Sky News, ITN, Evening Standard, Rai and The Independent to mention a few.

Now...we are going to New York to screen *Life Without Benedetta* as a gift to those still grieving from the events of 9/11 and also to the general public in America to raise awareness of the effects of terrorism on 'everyday people'. This will be screened to audiences on the 11th September 2008. To achieve this we are inviting you to a fundraising event in London and to be amongst the first to watch selected screenings of the documentary.

WHAT?

Exclusive screenings of *Life Without Benedetta*
